

Indian Valley, Plumas Co.,
Cal. Aug. 16th / 875.

Dear Dr. Gray;

I send you
to periwinks, I promised you,
of Dorlingtonia. I have
also put a few for Miss
Dorlington which I forward
by some mail, so that
you may keep these for
yourself.

I exceedingly regret that
I cannot find the *Lignocylus*
in fruit and shall have to
mail until another season.

I will send you fruiting
specimens of *L. Tetradia*.

Very respectfully Yours,
Mary E. Pulsifer Ames.

P.S. I shall be able to send you

a number of fruiting specimens
of the Euphorbia you wished,
with a package of other Butte
county plants - which my mother
collected for me. The Erythra-
minum in my last I
collected in Butte co., in Apr.
together with the Pedicularis.
I hope to have the pack
age ready for mailing by
the last of this week.

I see by a local "Rural" that
Mr Lemmon goes to the
Big Trees, to make, or as-
certain their correct age,
at your request. You
could find no better or
closer observer than he
to accomplish this.

Yours truly
W. D. Porter
